Technical Skills: Python basics (pandas, NumPy), Excel, Qualtrics survey design.

Quantitative Skills: Probability, statistics, basic regression, introductory differential equations.

ZIMO ZHUANG

UNIVERSITY OF CALIFORNIA SAN DIEGO | ECONOMICS

PROFESSIONAL SUMMARY

High–achieving Economics student with a 3.93 GPA and foundational skills in Python and data analysis. Demonstrated the ability to turn a research question into a completed study under mentorship, with work accepted for presentation at MVEA. Experience in business analysis has strengthened an interest in how technical methods solve real–world problems, motivating further exploration of mathematical modeling and machine learning. Brings the initiative to learn unfamiliar concepts independently and follow through on challenging work.

RESEARCH EXPERIENCE

Extraversion & Salesperson Presence | Student Researcher
• Independently conducted a 498–participant experiment under mentorship, examining personality and store–entry decisions.
• Analyzed findings and authored an abstract accepted for presentation at MVEA.

Green Advertising & Consumer Regret | Research Assistant
• Reviewed literature and built Qualtrics experiments with branching logic and attention checks.
• Supported data analysis and academic writing on advertising and consumer behavior.

WORK EXPERIENCE

Guotai Haitong Securities | Intern | Jul—Aug 2026
• Built foundational knowledge of securities markets through a one–month internship under mentor guidance.
• Gained exposure to financial analysis methods and the core skills used by financial analysts.

M–zing | Business Analysis Intern | Jul—Aug 2025
• Researched approximately 200 prospective clients and supported sales efforts, contributing to RMB 180,000 in team sales.
• Assessed client needs for embedded software development tools while learning about AI/ML applications and basic principles.
